LITTLE ITEMS OF LOCAL INTEREST

—Brood Sows For Sale. Bred and in good shape, due in latter part of April.—Apply to E. Spry, 9 1/2 miles north of Carbon.

FOR SALE—Seed Oats, Government germination test 92 p. c. Also Barley and Potatoes.—Apply A. Reid, Carbon.

Invitations have been issued for the Masonic Annual "At Home" to be given Friday evening April 1st. Shaw's orchestra from Calgary will supply the music.

Mrs W. A. Noble of Knee Hill was visiting with friends in Carbon this week.

R. E. Sells left Saturday for Calgary.

The third of a series of dances, in aid of the park fund, was held last Thursday evening in the Farmers' Exchange hall, and a merry crowd turned out for the occasion. Music was furnished by the local 5-piece orchestra and at midnight a delightful repast was served.

H. Hamshaw returned to Carbon on Friday.

Mr. and Mrs. J. Phillips and family returned to Carbon last Friday after spending the past year in the Old Country.

Dick Gimble returned to his home in Calgary on Friday last.

Mr. Warren Cochlin of Grainger attended the dance here last Thursday evening.

Mr. and Mrs. S. F. Torrance entertained a few of the young people at their home last Thursday evening, March 17.

Mr. Gordon Lapp, Provincial Boy's Work Secretary, will be the speaker at the United church next Sunday evening.

The Carbon W. M. S. Auxiliary of the United church held a successful Easter Thank-offering meeting at the home of Mrs. H. Willson on Tuesday afternoon, the thank-offering amounting to \$10.00.

At the close of the meeting, which included several readings suitable for the occasion, a dainty lunch was served, a special feature which was much enjoyed by the members and visitors present being a native Indian dish, curry and rice. This was in keeping with the request of the United Church Board that during the week of March 20th, each congregation in commemorating the 50th anniversary of our Mission work in Central India serve this particular dish at some gathering.

The Provincial and Dominion Governments have co-operatively organized Boys' and Girls' Swine clubs throughout the three Western Provinces. The Canadian Pacific Railway Company offers as a prize a trophy to each of these clubs.

In addition the winning teams will be taken to the 1927 Royal Agriculture Fair at Toronto next November as guests of the Canadian Pacific Railway Company.

D. F. McKinnon returned Wednesday from a business visit to Drumheller.

Mr. and Mrs. S. J. Garrett returned yesterday after spending the past six weeks visiting Mr. Garrett's mother in Victoria.

Mr. and Mrs. L. Coates were hosts at a jolly dance Tuesday evening at the Pope ranch. The Barr's orchestra of Carbon furnished the music.

Miss N. Hay returned to Carbon on Monday.

LOCAL STORE CHANGES HANDS

J. R. E. Coburn has completed the sale of his general store in Carbon to S. Dattner, the deal being closed last week.

Mr. Coburn is still retaining an interest in the business and will remain in Carbon and manage the store for the new firm.

The store is being enlarged to take care of the increased stock, which is being added and a much larger stock of groceries and dry goods will be carried in future.

Gamble Items

Mrs. J. Coates and son returned after spending the winter in Toronto. Mrs. Coates left her daughter there, where she is attending kindergarten.

Miss M. Hewes of Conridge, is visiting her sister, Mrs. J. Hudson.

Mr. and Mrs. Geo. Craddock and son have returned after spending the winter in Victoria.

Carl Dixon is listening in every evening with his new radio.

There are two dogs which serenade people who enter or leave Carbon by the east road. These people would appreciate it very much if the owners would tie up or dispose of the dogs.

FOR SALE

1 gasoline lamp, 2 fumed oak rocking chairs, 1 bed room rocker, 1 library table.—Apply at Farmer's Exchange.

Nova Scotia breeding hens are beginning to attract the attention of Great Britain. John R. McMullen, of this city, has just shipped to Chivers and Son, Cambridge, England, four barred Plymouth Rock cockerels. This is the second shipment of breeding stock made to this firm.

Curling history of a unique nature was made in Quebec city recently when the Jacques Cartier Curling Club, the first French-Canadian curling organization in the world, was inaugurated and their new curling rink formally opened. A delegation of seventeen prominent Montreal curlers, headed by T. Howard Stewart, Thane of Granite Curlers, arrived back at the Windsor Street Station from the Ancient Capital recently, where they officiated in the opening ceremonies of the new club in the neighboring city.

GOLF CLUB ELECT OFFICERS FOR 1927

At the annual meeting of the Carbon Golf Club, held in the Municipal hall on Monday evening the following officers were elected:

President, L. Poxon
Vice-president J. A. Toombs.
Captain A. F. McKibbin.
Sec.-Treas E. J. Rouleau.
Executive Committee: G. Peters, H. Bruels, R. J. Fairbairn and F. Bessant.

Membership Committee: J. A. MacDonald and E. J. Rouleau.

The fees for this year were set at: Gentlemen \$5. Ladies \$3. Junior members \$3. Family ticket \$10. With a fair sized membership, this fee was considered sufficient to carry on the work for the coming year.

Considerable discussion took place regarding the enlarging of the greens and the lengthening of the course, but the matter was left in the hands of the Executive committee.

The question of numbering golf balls came up for discussion and it was decided that the best way to do this would be for the secretary to give each player a number and they could number their golf balls accordingly. All golf balls found were to be turned in to the secretary and those found by caddies are to be redeemed at the rate of 10c a ball.

The secretary was instructed to write to the Drumheller Club and thank them for their courtesy in asking the Carbon club to include them in their summer's schedule of play. The secretary was also instructed to write to the Wayne club, asking a like favor of them. With these clubs included in this summer's schedule, great enthusiasm should take place in this popular pastime.

An air mail service for Canada is likely. The Hon. P. J. Veniot, Postmaster-General, remarked in an interview that the Postal Department at Ottawa are following with keen interest the successful activities of the United States air service and that something similar may be started in this country shortly. Definite announcement one way or the other would be made early in the New Year, said Mr. Veniot.

HEADQUARTERS FOR

AUTOS, OILS, TIRES, MACHINERY AND ACCESSORIES

A FEW POINTERS

Whether you buy from us or not, we will advise in our lines as above.

We have kept our doors open all winter. It has been a long winter. We have given service. When buying cars see us and we will give you a square deal and save you money. You do not have to run miles to get service.

WE INSTALL VAPORISERS IN YOUR FORDS

We have had vaporisers on the Case tractors for years.

What is a vaporiser? It is simply the fuel going through a hot chamber, breaking up the constituent parts and making easy combustion. Of course it saves and cleans.

You get the benefit of a course in the Coyne College of Electricity and autos, by bringing your work to

OLIVE BROS. GARAGE

DON'T FORGET TO HAVE YOUR TRACTORS OVERHAULED. GIVE THEM A CHANCE.

After long tests we are convinced **Aluminum** is the best container for tea.

RED ROSE TEA

Now packed only in **Aluminum**.

Branch Lines in the West

The next few years will witness great activity in branch lines railway construction in Western Canada, judging by the Canadian National Railways programme covering the next three years, recently outlined to Parliament by Hon. Charles A. Dunning, Minister of Railways, coupled with the intimation that has been given that the Canadian Pacific also plans extensive branch line building in the West, although, at the time of writing, the details of their programme have not been made public.

Canada is well equipped with main lines of railway; so well equipped in fact that the statement is frequently made that the Dominion has over-built in this respect. These main lines run east and west, carrying the products of the West to Ontario, Quebec, the Atlantic and the Pacific coast, and bringing to the prairies the manufactured goods of the east, and the fruit, fish, lumber of British Columbia, as well as the imports coming through our seaport cities.

But in order to make these long main lines profitable from an operating standpoint, there must be a veritable network of branch lines to feed them. It is in the West that these feeders are mostly needed, and where the possibilities for securing new and larger traffic is most promising.

There is another lack in the West in the railway situation as it now exists, and that is in the matter of lines running north and south, connecting the several east and west main lines. Branch line construction in more recent years has been planned so as to not only provide feeders to the main lines, but through a gradual linking up of these branches bring about connecting lines running in a generally north and south direction.

Branch line construction in the West must, in the future, have still another main objective in mind. The Hudson Bay Railway is being pushed to completion, and by the end of the year steel will almost if not quite reach to the Bay terminal. By the West, this railway is regarded as a main line, a direct Western route to the water and the markets of Europe. If this route proves to be what its advocates claim for it, then in the not too distant future millions of bushels of Western grain will move north which must now find an outlet either to the Atlantic or the Pacific.

Our existing network of main and branch lines must be provided with direct connection with the Hudson Bay Railway. Its success requires this, and the people demand it in order that they may enjoy maximum benefits which the new outlet should provide.

As the southern terminus of the Hudson Bay Railway is in Saskatchewan, it naturally follows that the initial work of providing direct connection with it must be done in that Province through the building of certain branches which will have the effect of linking up existing lines with the Bay road. The building of such lines are included in the C.N.R. programme recently announced. It would be a mistake, however, to regard these as purely Saskatchewan branches. They are just as important and as essential to Manitoba and Alberta as they are to the Province in which they must actually be built.

The construction of these connecting branches may also prove an important factor in effecting a complete change in transportation matters and development in this whole western country. Lacking any northern outlet to the sea, these products of Western Canada which do not go east to the Atlantic or west to the Pacific, are forced to move to the south, that is, to the United States, to Minneapolis, Chicago, and thence to Buffalo or New York.

With the opening of the Hudson Bay outlet, and the connecting of our existing railway systems with the road to the north, not only will our own western products find a shorter outlet, but, instead of Canada shipping to the south, products of the northwestern states will, because of these direct connections and shorter haul, move northward through Canada, providing additional traffic for our railways, and adding to the volume of business over the Hudson Bay Railway.

The appropriation of over \$5,000,000 for construction work on the Hudson Bay Railway, and of an even larger sum to be expended by the Canadian National in the next three years on branch lines in Saskatchewan to connect existing lines with the Bay road, and to provide direct connection for Manitoba, Southern Saskatchewan, and the northwestern states with the Bay, marks a new era in railway transportation in the West and in the development of the whole prairie section of the Dominion.

Children Cry for

Fletcher's CASTORIA

MOTHER:—Fletcher's Castoria is especially prepared to relieve infants in arms and children of all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of *Dr. H. H. Fletcher*. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

To Increase Egg Production

Hens Lay More Eggs With the Use of Light

The use of lights with the laying flock increases the winter and yearly egg production. Fall laying can be kept up by using lights from September 1 to November 1. It is possible by using lights to carry the early hatched pullets through their first production period with much less moulting than when lights are not used. Slow maturing pullets will mature faster under lights. Properly installed lights will increase in the labor income from the birds for the year.

Torture Jewish Boy

Anti-Semitic Wave Sweeps the Soviet Union

Three members of the Communist Party have been arrested at Ivanovo-Voznesensk, near Moscow, on charges of having tortured a Jewish boy named Bayrach, employed in a factory with them. They are alleged to have applied electric wires to the boy and to have nearly strangled him on one occasion.

The case has revealed a wave of anti-Semitism throughout the Soviet Union.

MARCH WEATHER

DANGEROUS TO BABY

On Account of the Very Sudden Changes in Temperature

Our Canadian March weather—one day bright, but stops, the next blizzard and cold—is extremely hard on children. Conditions make it necessary for the mother to keep the little ones indoors. They are often confined to overheated, badly ventilated rooms and catch colds which rack their whole system. To guard against these colds and to keep the baby well all the better, brighter days come along, a box of Baby's Own Tablets should be kept in the house and an occasional dose given the baby to keep his stomach sweet and his bowels working regularly.

Baby's Own Tablets are a mild but thorough laxative which never fail to regulate the stomach and bowels and thus relieve colds and simple fevers and keep baby fit. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Indians Are Good Farmers

Indians of Prairie Provinces Produced One Million Bushels of Grain Last Year

The Indians of the three Prairie Provinces—Manitoba, Saskatchewan and Alberta—last season produced in round figures one million bushels of grain, of which about half, or 588,000 bushels, was wheat, according to a recent Government report. There are about 35,000 Indians in the area in question and the land reserved for their use includes some of the most fertile soil in the Prairie. They had 57,000 acres under cultivation in 1926. They own about 25,000 head of cattle and 25,000 horses of a good type.

Asthma Victims. The man or woman subject to asthma is indeed a victim. What can be more terrifying than to suddenly be seized with paroxysms of choking which seem to fairly threaten the existence of life itself. From such a condition Dr. J. D. Kellogg's Asthma Remedy has brought many to completely restored health and happiness. It is known and prized in every section of this broad land.

Building Boom in Winnipeg

Winnipeg is on the threshold of one of the greatest home-building years of its history, a summary of plans of local contractors reveals. Plans are already drawn up for 118 homes, which will cost \$1,000,000, construction of which will commence as soon as the frost is out of the ground.

Internally and Externally it is Good.—The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pains in the chest, colic and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

An American electrician has discovered that lightning wanders around a good deal in space. We are more concerned with what it does when it comes to land.

For sale everywhere—Midland's Liniment.

"Should be in every home" Says Mme. Villemaire

Three years of stomach and kidney disorders wrecked her health. Now fully recovered and feeling splendid, she thanks Tanlac

Mme. Eliza Villemaire lives at 432 St. Patrick Street, Ottawa. She is ruddy and robust, showing no signs of the distressing ordeals she went through for three years. "No words can express what I suffered," she said recently. "At times I thought my back must break, and I could not even stoop over to set the table."

"My stomach was just as bad, for food would lie there like a lump of lead. I used to bloat terribly, and at times could hardly catch my breath. Nervousness kept me awake half the night. I tried many remedies and treatments but though I spent a small fortune on them, nothing seemed to help me."

"I only wish I had taken Tanlac when my trouble first started for it certainly would have saved me a lot of suffering. The way my troubles disappeared after taking it was almost magical. It built me up and made me a new woman. Now my kidneys never bother me, I am free from all pain and my digestion is splendid. If

I had my way I'd put Tanlac in every home in Canada. That's how much I think about it."

Don't neglect nature's warnings. At the first sign of trouble, take Tanlac, nature's own tonic, made from roots, herbs and barks. Your druggist has it; get a bottle today. Over 52 million bottles sold.

Working Women Want Chance

Too Many "High-Brows" in British Parliament Opinion of Women Socialists

Many women in the Socialist and Labor movement in England, have reached the conclusion that too many "high-brows" are representing them in parliament. They point out that there are no genuine working women selected as Socialist parliamentary candidates but that women of higher social rank can obtain nominations quite easily. Consequently plans are under way to raise a fund of \$15,000 a year so that working women will have a better chance of competing with their more fortunate sisters in the party for parliamentary honors.

Why suffer from corns when they can be painlessly rooted out by using Holloway's Corn Remover.

The hottest flame man has been able to produce, by electricity, is estimated at 30,000 to 80,000 degrees.

There are now 31,000 miles of railway and 23 million acres of canal irrigated lands in India.

Motoring in Alberta

All-the-year-round motoring is now planned in Alberta, a result of the fact that there is an automobile to every ten persons in the province.

IF STOMACH IS TROUBLING YOU

Instantly! End Indigestion or Stomach Misery with "Pape's Diapepsin"

As soon as you eat a tablet or two of "Pape's Diapepsin" your indigestion is gone! Heavy pain, heartburn, flatulence, gases, palpitation, or any misery from a sour, acid stomach ends. Correct your stomach and digestion for a few cents. Each package guaranteed by druggist.

Property in the west end of London is still held on leases granted three or four centuries ago.

When a man is a little mellow he imagines that he is ripe for anything.

Exhaustive Tests Are Made On the Comparative Merits Of Garnet and Marquis Wheat

After having conducted extensive tests on the comparative merits of Garnet and Marquis wheats, the two early maturing cereals developed within recent years, the Federal Department of Agriculture reports that "we cannot recommend Garnet as a substitute for Marquis in districts where the latter variety may be depended upon to thrive successfully." The report points out, however, that even in those districts where conditions are inimical to the proper development of Marquis wheat, it may often be profitable to the farmer to cultivate Garnet wheat in part of the area devoted to wheat.

The report points out that "from the standpoint of milling and baking qualities, Garnet undoubtedly does not rank as high as Marquis, all things considered, although it seems entitled to a place among the good milling wheats. The chief point regarding which Garnet is open to criticism is in color of the flour. This without doubt is more 'creamy' than Marquis. Since, however, bleaching and maturing processes have become so highly developed and are becoming so generally practised, the objection of the color of Garnet would appear to be appreciably minimized."

Commenting on the results of the comparative baking tests of the two wheats, the report says that "generally speaking, the flour of Marquis absorbs a little more water than does that of Garnet and, consequently, is inclined to produce a little higher bread yield."

Garnet wheat, however, by maturing from five to ten days earlier than Marquis, has a decided advantage in the early frost belt.

The department summarizes the result of its experiments as follows:

"On the average of all tests conducted to date on the federal experimental farms and stations as well as on provincial farms Garnet outdoes Ruby quite definitely, but there does not appear to be a significant difference in yielding ability between the former variety and Marquis. This statement would seem to apply pretty generally to tests conducted by farmers as well.

"On the other hand, Garnet appears capable of out-yielding Marquis by a substantial margin in specified districts, notably those in which an early variety has a distinct advantage.

"Garnet matures from five to ten days earlier than Marquis and about a day ahead of Ruby. Under certain conditions the difference in maturity between Garnet and Marquis may be considerably greater than the above.

"In strength of straw Garnet appears to come between Marquis and Ruby, being slightly stronger than Ruby, but not quite so strong as Marquis. Under some conditions, however, Marquis shows distinctly greater strength.

"In tests conducted at the rust research laboratory, Winnipeg, Garnet did not display any resistance to any of the seven physiologic forms of stem rust used.

"Although this variety may not possess rust resistance, it may prove of value in rust areas by partially escaping this disease, owing to its ability to mature early.

"In the case of samples obtained from the Dominion experimental farms and stations in the prairie provinces in 1924 and 1925, Garnet weighed slightly less per measured bushel than did Marquis. On the other hand, records at the Dominion farms at Brandon, Indian Head, Rosethorn, Scott and Lacombe over a period of six to eight years, show that Garnet and Marquis averaged 62 pounds and 61.9 pounds per bushel, respectively. Where the supply of moisture is ample, Garnet appears to equal, if not to excel, Marquis in weight per bushel. Thus, over a 12 year period at Ottawa, Garnet averaged 61.1 pounds and Marquis 62.7 pounds per bushel.

Balsam wood weighs less than half as much as cork, and as a heat insulator is superior to cork.

Large beetles, found recently in Costa Rica, emit light sufficient to illumine a large room.

W. N. C. 1871

Advocates More Sheep

Canada Should Produce a Greater Share of Its Own Wool

Advocating more sheep on the smaller farms in Canada the Dominion Livestock Commissioner, speaking at the annual meeting of the Ontario Sheep Breeders' Association, stated that farmers need not be afraid of extending their sheep holdings. The Dominion imports \$16,000,000 worth of woollen goods while it produces less than \$5,000,000 worth of wool. There was no reason, he urged, why Canada could not produce a greater share of its own wool as, barring a few of the finer grades, Canada can manufacture cloth largely from her own raw material, which will compare favorably with anything in the world.

Manitoba Tax Collections

Increase Shown for 1926 of Over Half a Million Over Previous Year

Provincial collections under the Manitoba Tax Commission for the calendar year 1926 exceeded \$3,333,000, or an increase of more than \$500,000 over the figures for the previous year, according to the report of the Commission tabled in the Legislature by the Hon. D. L. McLeod. These figures are thought to point to another surplus to be announced by Premier John Bracken at the close of the fiscal year, ending April 30th. Virtually all the major revenue producers show increased returns as compared with 1925.

The Cardigan Dress is Modish

Exceedingly smart is the attractive cardigan dress shown here, and a style suitable for both the miss and matron. The two-piece skirt, having inverted plaits in front and back, is joined to a dart-fitted underbodice. The jacket has a facing and collar in one, a vestee, and smart patch-pockets. The long dart-fitted sleeves are finished with bands, and a trim belt fastens in front. No. 1526 is for ladies and misses and is in sizes 16, 18 years, 38, 40 and 42 inches bust. View A size 38 requires 4 1/4 yards 39-inch material, or 3 yards 54-inch. View B size 38 requires 2 3/4 yards 39-inch plaid material, and 2 3/4 yards plain; 1 1/4 yards 36-inch material for underbodice. Price 29 cents the pattern.

The designs illustrated in our new Fashion Book are advance styles for the home dressmaker, and the woman or girl who desires to wear garments dependable for taste, simplicity and economy will find her desires fulfilled in our patterns. Price of the book 10 cents the copy.

Airplanes Saving Forests

Pilots Not Only Spot Fires But Help Conquer Them

"Every year," said Hon. William Finlayson, Minister of Lands and Forests in the Legislature, "we have the same number of fools starting fires in the bush. Now we can't control the idiot who throws a burning cigarette away, but we can spot a fire when it is still small and prevent it from spreading."

How is it done? Ask the "Falcon," for instance, says Mr. Finlayson.

On July 4, 1926, at 4 o'clock in the morning, forest patrol machine "Falcon" with Pilot Russell, and Air Engineer Cheeseman, spotted a fire in valuable spruce timber in unsurveyed territory around Clearwater Lake, far out of the beaten path of the forest fire ranger. What happened?

Well, the "Falcon" flew direct to its base at Pine Ridge, 45 miles distant, for assistance. It flew the course 13 times that day putting in more than 11 flying hours. To the scene of the fire it transported ten men, 1,550 pounds of food, innumerable blankets, 300 feet of hose, extra pumps, two canoes and other materials with which to prevent the spread of the conflagration.

Furthermore, Pilot Russ also flew his "beat" to Lac Seul to bring in three extra fire-fighters. At 7 o'clock the same night the fire was out, with less than an acre of timber consumed.

"This," said Mr. Finlayson, "is only one of a half-dozen stories of this kind that I might relate. Our planes nowadays, not only spot fires, but conquer them."

Ontario, according to figures supplied by the Minister spends approximately \$1,000,000 yearly on her forest fire protection.

Is it worth it?

Well, in 1926, there were 106,000 less acres of timber destroyed by fire than there were in 1925, although the Province reported 1,195 fires — only 50 fewer than the previous year.

There's a reason for that, unquestionably.

"And the 'Falcon,' for instance, can tell you," says Mr. Finlayson.

Developing Hydro Power

Five Million Horse-Power to be Developed in Western Ontario and Northern Manitoba

Applications for permits to develop hydro power in Western Ontario and Northern Manitoba are on a scale that represents an ultimate volume of 5,000,000 horse-power, indicating the industrial growth that the territory is achieving. These range all the way from the Lake of the Wabos country to the basin of the Nelson River, and relate to pulp and paper mills, mining plants, civic hydro promotion and transportation projects.

Paid \$3,200 for Penny Book

A book which once sold for one English penny, brought \$3,200 at auction in New York. The volume was a first edition of Edward Fitzgerald's "Rubaiyat of Omar Khayyam," published 1889.

Carbonized Coal May Prove To Be Solution Of Canada's Fuel Problem

Market for Bacon

Strong Competition Developing in European Countries in Supplying Bacon for British Market

The December review of the live stock situation by the Markets Division of the Dominion Live Stock Branch is one deserving of more than ordinary attention. It is to some extent a commentary on the year's trading. With British industry in more of a settled state than it has been for many months the hope is expressed of an improved export trade.

The most significant remarks are regarding the bacon market. The supply of hogs, the review says, was short of requirements and producers consequently found the outlet most remunerative. No very material increase in production is in sight, outlines the review, and it is hoped that the Canadian producer will see to it that supplies are brought back to more liberal volume, with the strict provision that there is a very marked increase in the volume and percentage of select stock. The reason for this advice is found in the statement that countries in Europe other than Denmark are developing a bacon trade with Great Britain and are improving the quality along with the volume.

The comments in the review of the bacon trade closed with the following sentence, which well merits extra consideration: "Our place in the British market can only be maintained on the basis of steady supply of good dimensions, but along with this the product must be of an increasing improved quality so that we may successfully hold our own against the improving quality of the competitive product."

In 1926 the supply of select bacon hogs increased in Alberta and Manitoba but showed a falling away in the totals for the whole of Canada in 1926 being 144,609, and in 1925, 161,581.

Idle Lands in Manitoba

Plenty of Land Accessible to Railways Available for Settlement

There are immediate settlement opportunities in Manitoba for 1,425 families, according to Prof. R. W. Murdoch, speaking at the convention of the Manitoba Agricultural Societies. These lie in lands at present unused, accessible to railways, schools, churches and other modern conveniences. Altogether, he stated, there are approximately 9,500,000 acres of unused lands in the province, most of it being yet without the aforementioned facilities.

Fools occasionally find opportunities, but wise men make them.

Fox Farming Flourishes

45,000 Foxes Imported and Tattooed for Registration Purposes

During the inspection season which lasted from October till January, about 45,000 foxes were inspected and tattooed for registration purposes, according to the annual report of the Dominion Department of Agriculture. The pup crop was an average one and the price for the foxes were reported as higher than those of the previous year. As usual, thousands of foxes were exported to the United States and in addition a number of European countries came to Canada for foundation stock, including Germany, France, Russia, Norway, and Great Britain. Norway purchased 500 pairs and Russia gave some of her famous sable in exchange for silver foxes. Having established a market in Europe, fox breeders are looking forward to a good trade for some years to come.

Port Arthur Elevators

Now 34 Elevators in the Twin Cities at the Head of the Lakes

Additions to three grain storage units at Port Arthur, increasing capacity by 2,600,000 bushels, for which contracts have been let, will give elevators at this point a total storage capacity of 32,750,000 bushels in the fourteen plants. In the Twin Cities there are 31 elevators with a present capacity of 63,500,000 and the additions will bring this to 66,150,000 bushels, or nearly 10,000,000 more than St. Paul Minneapolis, which now has 67 elevators. It is understood that the additions will be completed in time to handle the 1927 fall crop of grain.

Pure Bred Stock

In the last ten years pure bred horses have increased 5 1/2 per cent. in Canada and pure bred cattle 450 per cent., according to Hon. John S. Martin, Ontario Minister of Agriculture. The value of Canadian livestock, he said, is \$750,000,000, a third of which is owned in Ontario. A big improvement is seen in the race of sheep and hogs.

A formula has been recently discovered, by which a factory in Hobemia makes what is said to be practically unbreakable glass.

Beauty and the Beast in the Rockies

Miss Mary Cross, of Calgary, Queen of the Carnival recently held at Banff, certainly knows how to handle a cayuse, and when it comes to packing a load on one has little to learn from Bill Potts or any other of the famous guides that abound in that section of the Rockies. The cayuse also appears to be enjoying the sport since he is taking a peek at the fair lady who is stringing him along. Miss Cross was one of the attractions at the Big Winter Show at Banff, where not only winter sports, but some much more intimately connected with summer, such as open air swimming, was indulged in, thanks to the warm Sulphur Springs of that favored locality. The Carnival was a record success in all ways this year.

U. S. VESSELS SEIZE RUM SHIP ON THE HIGH SEAS

San Francisco.—That the Government has carried its war against liquor smugglers to the high seas without regard for the 12 mile limit in cases where the ships involved are known rumrunners, became apparent here as Federal officials discussed the seizure of the freighter *Federalship*, owned by the Consolidated Exporters, Inc., of Canada, 300 miles off San Francisco, with upwards of \$1,000,000 worth of Scotch whiskey aboard.

The seizure was conducted under orders from Lieutenant Frank Austin, aide to Captain F. G. Dodge, district coastguard commander.

W. R. Hamilton, collector of customs here, although disavowing any connection with the seizure, said he "supposed" it was made as the result of an understanding among the governments of Canada, the United States and Panama and also with the advice of United States Attorney General Sargent.

The *Federalship*, one of a fleet owned by the Consolidated Exporters, Inc., which recently figured in smuggling investigations by both the Canadian and United States governments, was watched by coastguards since February 22, when, on sailing from Vancouver, B.C., she changed her registry from British to Panamanian. At the time she was reported heading for Tahiti.

The coastguard cutter *Algonquin* was sent to follow the *Federalship* and later the cutters *Chabok*, *Shawnee* and *Smith* were sent from here to aid.

Department of Revenue

New Name is Proposed for Department of Excise and Customs

Ottawa.—A bill was introduced in the House of Commons by Hon. W. D. Fisher, Minister of Customs, which will make certain changes in the organization of his department. The minister explained his department had three principal duties. One to collect customs, another excise, and the third income taxes. The bill provided that each of these divisions would be under the charge of a commissioner who would have practically the same power as a deputy minister. By this method, it would be possible to relieve the deputy minister of some of his duties.

Another provision of the bill changes the name of the department from that of Customs and Excise to that of the Department of National Revenue, or the Department of Revenue. This change was made, Mr. Fisher said, not from any prejudice because the department under the present name had been under attack, but because it was thought the new name more properly describes its functions.

Are Hostile to Soviets

Opposed by Majority of Russian People Says Kerensky

New York.—Alexander F. Kerensky, who headed the revolutionary government established in Russia after overthrow of the Czar, arrived on the Olympic for the purpose of studying American principles of liberty. He also intends to write for American consumption on the present day Russian situation.

Kerensky thought 99 per cent. of the Russian people were hostile to the Soviet. He expressed the opinion, however, that more good had come out of the Soviet "although it had turned sour" than could ever have come out of the Czarist regime.

Attempted to Introduce Bill

London.—An amusing incident occurred in the House of Commons when a group of anti-Russian Conservatives, desiring to break off relations with the Soviet, attempted to introduce a private bill to prevent British recognition of any foreign government indulging in anti-British propaganda.

Build Three Cruisers

Washington.—The appropriation for three new cruisers put into the naval bill by Congress over the recommendation of President Coolidge, received presidential acquiescence when Mr. Coolidge signed the bill.

W. N. U. 1671

Reindeer Investigation

Government Would Provide Food Supply for Natives of North Country

Ottawa.—A wireless message has been received by the Northwest Territories branch of the Interior department from the Porolli brothers at Point Barrow, Alaska, reporting on the progress of their work on the reindeer investigation. These two Danish brothers are now on a 1,200-mile push across Alaska and the extreme North coast of Canada making an investigation into the possibility of moving reindeer from Alaska into Canadian territory to maintain the food supply for the natives. Game in that section of the Canadian North is in danger of extermination and the survival of the Eskimo is menaced.

The two Porolli brothers went into the North country last June and will not come out until the spring of 1928, when they will make their report to the Dominion Government on all phases of the reindeer question, including the commercial possibilities. It is expected that within a few weeks the little two-man expedition will be in the delta of the Mackenzie River. The men are trained naturalists and botanists and are sons of the governor of Greenland.

Vancouver Men Chosen

Four Posted to Special R.C.A.F. Squadron for Hudson's Bay Survey

Vancouver. Four Vancouver men have been posted to the special Royal Canadian Air Force squadron which will fly into the Hudson's Bay country for a fifteen months' survey of ice conditions. It is announced.

Squadron Leader J. H. Tudhope, M.C., officer commanding the Vancouver unit, has been advised from Ottawa that Flying Officer A. Lewis, of Winnipeg, who came here recently as instructor for the training courses this spring, and Pilot Officer A. J. Ashton, who had been adjutant of the Jericho Beach station for some time, have been posted to the special squadron.

Lewis and Ashton will remain at Camp Borden in Ontario until June, in training for the flight.

Sergeant Perry, engineer-fitter and Corp. Semple, carpenter-fitter, have also been ordered to the Hudson's Bay flight. Both have been at Jericho Beach for some years.

It is understood that eight machines will comprise the squadron, which will establish its base at Hudson's Bay and do regular patrols from June, 1927, until October, 1928. Twelve officers and 50 men will be employed.

Britain Remains Neutral

Taking No Sides in Struggle at Shanghai Says Chamberlain

London.—Great Britain will continue to maintain an attitude of strict neutrality in the struggle between the contending Chinese forces, Sir Austen Chamberlain said in the House of Commons. Asked whether the United States is cooperating with British authorities in the defence of the international settlement at Shanghai, the secretary of foreign affairs said the United States was acting independently in defence of its own interests in China.

"There is no rivalry between the United States and ourselves," declared Sir Austen. "They act as an independent power and as they think proper."

Sir Joseph Hall asked whether this meant that the United States was unprepared to take action in the defence of Nationals of other countries.

"No, I have not said that," responded Sir Austen. He added that he was not inclined to define the attitude of a foreign power in unconsidered answers to such questions.

Pilgrimage to Holy Land

Ottawa.—Preliminary steps have been taken to organize a Canadian pilgrimage to join with the fourth annual Anglo-Catholic pilgrimage to the Holy Land this summer. This will be the first time that Canadians will take part in the pilgrimage officially.

Babe Ruth's Contract

New York.—Babe Ruth, home king of baseball, came to an agreement with the New York Yankees under which he will receive a new three-year contract at an annual salary of \$70,000.

PROPOSED TAX ON FURS FROM NORTH COUNTRY

Ottawa. For the first time in 200 years a tax is to be placed upon furs from the Northwest Territories. Within a few days Hon. Charles Stewart, minister of the interior, will introduce a bill into the House of Commons to empower the Commissioner-in-council of the Northwest Territories to impose a tax per pel on furs.

At the present time about \$2,000,000 worth of furs are taken from the territories each year by trading companies without revenue to the federal government. The proposed tax is designed to meet to some extent the cost of maintaining the administration of Canada's northland. It is pointed out that every province of Canada has some sort of tax upon furs taken within its boundaries. The tax is to be upon exportations in order not to work any hardships upon the natives who depend upon skinning for clothing.

Oil Magnate Hard Hit

Edward L. Doheny Will Lose Millions As a Result of Court Decision

Washington. Edward L. Doheny will lose \$21,686,328 as a result of the Supreme Court's decision of cancelling his leases of Elk Hills, California, oil reserve from the navy department.

Of this amount \$9,900,000 in cash is held by the receivers, who have operated the reserve during the litigation.

It represents the value of the oil he received as a royalty payment for working the deposits of the reserve.

The balance represents expenditure made by the Doheny interests in mining the oil and constructing fuel tanks at Pearl Harbor, Hawaii, and the oil stored there.

Will Not Land in Nicaragua

London.—Sir Austen Chamberlain, foreign secretary, reiterated in the House of Commons that no forces would be landed in Nicaragua by the cruiser *Colombo*, which has proceeded to San Juan, where conditions are disturbed by civil war. He added that the *Colombo* would not remain at Corinto very long unless it should be needed as a refuge for British subjects.

Dominions Are Invited

Sydney, N.S.W.—An invitation has been extended to all the British Dominions to be represented at the opening of the parliament houses at Canberra, by the Duke of York on May 5. Premier Bruce has expressed the hope that Canada will send a minister.

Proposal of Western Livestock Men Opposed

Eastern Producers Against Changes Advocated at Regina Conference

Ottawa.—Eastern livestock producers and representatives of the livestock exchanges in this part of the country who met the minister of agriculture went dead against the proposal of the Regina conference of Western livestock men respecting contemplated amendments this season to the Livestock and Livestock Products Act.

At the Regina conference the main resolution adopted was that the actual administration of stockyards be taken out of the hands of the exchanges and placed directly under the Department of Agriculture. They favored development of co-operative marketing and agreed to adequate provision for it being made in the Act, under department supervision, but they objected to the exchange being put out of business.

The Act is to be entirely revised this session and, on a variety of things, the opinion of the livestock interests is sought but marketing is the most important issue.

The Government will have to decide the matter but, meanwhile, the conference disclosed that the Western view is utterly dissimilar from that of the East.

Involve Questions of International Law

Rum-Running Case Taken to Canadian Legation at Washington

Washington.—Rum-running cases affecting Canadian citizens and ships of Canadian registry are beginning to find their way to the new Canadian legation here.

Formerly they were dealt with by the British Embassy, which will dispose of most of the cases begun before the Canadian legation opened. Others are being turned over to Vincent Massey, the Canadian minister and his staff at discretion of the Department of External Affairs at Ottawa.

Some of the cases involve difficult questions of international law and will form one of the most delicate tasks confronting the Canadian legation.

May Extend Term of Office

Ottawa.—Major General J. H. MacBrien, chief of general staff department of National Defence, whose resignation was to take effect on May 1, will probably continue in office until June 1, as the result of the request of the Minister of National Defence.

APPROVE BUDGET BY A MAJORITY OF 23 VOTES

Ottawa. The first budget of Canada's sixteenth Parliament has been carried in the house by a majority of twenty-three votes. Approval of the budget on division by a vote of 111 to 88 produced none of the elements of surprise; while defeat of the Coote amendment by 132 to 21 was likewise expected. The debate, however, was one of the shortest on record.

Liberal and Liberal Progressive lined up solidly in support of the budget on the division, while, with three exceptions, Conservatives, Progressives and members of other groups voted in opposition. The exceptions were: H. B. Ashland, Labor, Calgary East; L. H. J. O'Brien, U.E.A., Lethbridge; and A. W. North, Independent, Comox-Alberni. All three voted for the budget. Henri Bourassa, Independent, L'Abbaye, voted against it.

As indicated early in the discussion the Coote amendment found its supporters in the U.E.A., Progressives and Labor groups.

The amendment was moved by G. G. Coote, U.E.A., Macleod, and seconded by A. W. Heaps, Labor, Winnipeg North, following a conference of the members of the three groups who supported it.

Diamond Rush in South Africa

Gems Worth Quarter of a Million Found on Farm

Johannesburg.—Diamonds estimated to be worth \$50,000, (about \$250,000) are reported to have been found in a hole on the Grafton farm, reputed to contain the most valuable diamond deposits in the world. The hole, 25 feet deep, is said to show no signs of having been cleared of its diamond deposit.

The Grafton farm in the Transvaal was proclaimed open to public digging last week, but there was a premature rush to stake claims before the signal was given. The stakes set out by eager peggers were pulled up and the claims nullified, and the authorities are considering the advisability of arranging another rush.

Raise Pool Payment

A New Rate of Initial Payments to be Made by Manitoba Pool

Winnipeg. A new rate of initial payments to be made by the Manitoba Wheat Producers, Ltd., on all pool grain was announced here by R. M. Mahoney, manager. The revised rates become effective on March 9. The schedule follows:

During and during mixtures, where durum predominates, 20 cents; all other grades of wheat, 15 cents; all grades of oats, eight cents; all grades of barley, six cents; rye, 12 cents; fax, 20 cents.

The increase affects both dried and cracked lots.

Coal Rates Case

Ottawa.—That the coal rate case is within the jurisdiction of the railway commission, and no direction will be given is the decision of the privy council of Canada on the request of Alberta and Saskatchewan for immediate disposal of the case by the railway board. Chief Commissioner MacKeown made this announcement at the freight rates session of the railway commission.

Wants New Saar Head

Paris. The Petit Parisien understands that Canada is anxious to provide a successor to Major G. W. Stephens, Montreal, in the presidency of the League of Nations commission governing the Saar. The newspaper believes that doubtless "Sir Austen Chamberlain, British foreign secretary, would support Ottawa's choice of a nominee."

Will Meet at Coast

Vancouver.—Final arrangements have been completed here for the holding of the sixth all-Canadian conference on child welfare in this city May 23, 24 and 25 in Victoria, May 25, at a meeting between Miss Charlotte Whitton, Ottawa, secretary of the Canadian Council of Child Welfare, and a local committee.

Mecca For Champions

Quebec City has become the gathering place not only for winter tourists but for champions in every line of winter sports. The Canadian indoor speed skating championship races held there recently attracted over 25 prominent speed skaters from many parts of Canada and the United States.

The above photograph was taken at the Chateau Frontenac and shows at the right, Lella Brooks of Toronto, holder of practically all Canadian women's speed records and many world's records. At the left is Isabel McCullough, another prominent Toronto speed skater. Between these two young ladies is another champion, a champion of the northern trails and none other than Mounie, the lead dog of the Chateau Frontenac dog team. Mounie has a long record of service with the Royal Canadian Mounted Police in the north, and always wins the hearts of the guests at the Chateau Frontenac.

The Carbon Chronicle

E. J. ROULEAU, Publisher

Printed every Thursday at Carbon, Alta.
\$2.00 a year

Don't go abroad to buy something when you have a few dollars to spend and ask your home merchant to sell to you on time when you are broke. If you have bills with your merchant who has given you credit and an extension of time and accepted small payments, and take your cash to the city to spend with a stranger who has no interest in your town, nine times out of ten he will "do" you because he never expects to see you again. The home merchant will save you money with reliable goods which he guarantees with his reputation.

Yes these are hard times. We throw away ashes and buy soap. We raise dogs and buy hogs. We grow weeds and buy vegetables. We catch fish with a \$10 rod. We build school houses and send our children to be educated away from home. And we send our boys out with a \$40 gun and a \$19 dog to hunt ten cent game.

Why is a newspaper like a pretty woman? To be perfect it must be the embodiment of many types. Its form is made up. It is always chased though inclined to be giddy. It enjoys a good press; the more rapid the better. It has a weakness for gossip. Talks a good deal. Can stand some praise, and it's awfully proud of a new dress.

The best friends are those who stimulate others to do good.

Toronto. — Ontario cattle scored signally at the National Dairy Exposition in Detroit last week with a prize winner in each of the first four Holstein breeds. This is a better record than that of any other part of the continent. The prize winners were: Leroy Siddall and J. F. Gibbons, of Denfield, T. O. Dolson, of Brampton, and Haley and Lee, of Springfield. A number of lesser prizes also went to Canadian breeders.

"Anyone who has other than an unbounded faith in the future of Canada, must be either without eyes or mind," declared Sir George McLaren Brown, European general manager of the Canadian Pacific Railway, who returned to the company's headquarters in Montreal recently after an extended tour of the Western Provinces. Sir George was greatly impressed with the growth of the city of Vancouver, where he visited after an absence of 15 years.

Here and There

Portage La Prairie, Manitoba. — Ten carloads of flour have been shipped to Salonika, Greece. The flour is made from Manitoba Number 1 Hard wheat and labeled as such. This large order is thought by the milling interests to represent the opening up of a new, valuable trade channel.

Saskatoon. — The colonization boards of the province, operated under the C.P.R. Department of Colonization, are doing a splendid work in colonizing the province along right lines, according to Mayor Potter, of Saskatoon, and other speakers, at the second annual meeting of representatives of these boards.

While the gypsy has been a familiar figure in fiction for at least a century, the novelist has usually taken for his characters the wild Romany types. But there is a modern type who has adopted himself to city life. It is this type that John Murray Gibbon, Dean of Publicity of the C.P.R., has chosen for the leading character in his new novel, "Eyes of a Gypsy."

Toronto. — The Ontario Government is spending \$1,000,000 during the present fiscal year to make hydro-electric power available to the farmers of the province. This follows the plan begun by the Drury Government, of paying one-half cost of primary line construction, and later extended by the Ferguson Government to secondary line work as well.

One hundred young men from the British Isles will take up their studies of Canadian farming at the Agricultural College at Olds, Alberta, soon. Seven of these prospective Canadian farmers arrived in Canada on the Canadian Pacific liner "Montcalm" recently, being brought out under the Hoadley Immigration scheme, which is being carried out in conjunction with the Empire Settlement Board.

The first annual meeting of the Canadian Boards of Trade was held at Saint John, N.B., October 18th. Over 150 representatives from the civic administrative bodies of every Canadian city gathered at the Windsor Street Station in Montreal, where they entrained and proceeded over the Canadian Pacific lines to Saint John. Matters of vital interest to civic administration were discussed at the three-day convention.

Control of the fish and game industry in the State of Ohio is being sought by a commission composed of five experts on game conservation. This industry is at present in the hands of the Department of Agriculture. The proposal will be placed before the government by the game and fish leagues in Ohio, the belief being that the existence of such a commission would be in accordance with the growing importance of the fish and game industry in that state.

A Record Fish and Story

1 The peaceful Cains River where the fighting "hook bills" lurk.
2 In action on the Cains River. 3 Proof of the "fish story."

W. E. Kidder of Kalamazoo, Michigan arrived in Montreal over Canadian Pacific Railway lines, recently with the best "fish" story of the year. It was a pretty good story, and we had to believe him, especially when he showed us a forty-pound salmon packed away in ice in the observation car.

Now, Mr. Kidder is a pretty good fisherman, but he says that the experience he had while fishing in Cains River, New Brunswick is absolutely unique, and that as far as he knows he was successful in hooking what is probably a record salmon with a trout rod and fly.

"This fish is unquestionably the largest hook bill, I have ever seen," said Mr. Kidder, "and the same

opinion was expressed by game wardens who viewed the fish in the live box. But the really great point was the terrific fight that this fish put up. This was so spectacular and so fast and furious, accompanied by rush after rush of 150 to 200 feet, that we had no time to take a picture of it.

"My canoe man and myself were busy every second of the time from twenty minutes past four until after dark. In fact up to the last few minutes of the fight I stood with one foot in the bow of the canoe constantly, when I was not in the canoe and chasing the fish back and forth across the stream.

"This fish was forty-five and three-fourths inches long measured in a straight line. If measured around the contour of the body it would probably show two or three inches longer than this. These measurements were

taken after he had been fighting the wires of the live box for five or six days, in which he undoubtedly lost a great deal of weight. Perhaps if he had been measured when first taken from the water he would have been at least two inches more.

"However, no matter how you look at it, he was big enough to suit me, and the act that it was a 'hook bill' and 'leaping fish' instead of a female or 'sulker' gave me that much more satisfaction. Then, too, it was taken with a No. 12 fly, which is very much smaller than is commonly used for six inch trout. The rod weighed only four and seven-eighths ounces, and the ordinary trout leader, with a three pound breaking strength was not much heavier than is commonly used for a small trout fly."

Air Mail Facilities Offered to Canada

U.S. Plan Would Save Day on Coast to Coast Letters

Air mail routes in the United States have been made available to Canadians. For an extra ten cents per half ounce letters from Canada will be carried by the coast to coast air mails operated under contract with the United States government.

Letters destined to British Columbia are carried to Elko, Nevada, by air, transferred to a Seattle train, and from there trans-shipped to Vancouver or Victoria. A net saving in time of at least a day is ensured. Letters to United States points on the Pacific coast are delivered at least two days earlier on the average.

The announcement of the United States post office department points out that the extra ten cents for air mail routes must be prepaid from Canada in United States postage stamps.

Fine for catarrh when melted in a spoon or snuffed up the nose and vapors inhaled.

Head and Chest Colds Relieved In a New Way

A Salve which Releases Medicated Vapors when Applied Over Throat and Chest.

Inhaled as a vapor and, at the same time absorbed through the skin like a liniment, Vicks VapoRub reaches immediately inflamed, congested air passages.

This is the modern direct treatment for all cold troubles that is proving so popular in Canada and the States where over 17 million jars are now used yearly.

Splendid for sore throat, tonsillitis, bronchitis, croup, head and chest colds, catarrh, asthma or hay fever.

Just rub Vicks over throat and chest and inhale the medicated vapors. It quickly loosens up a cold.

VICKS VAPORUB
OVER 21 MILLION JARS USED YEARLY

complimenting him upon some new triumph within his profession. She reached over and patted his hand and then pressed it for a moment in her own. "That's splendid," she repeated. "Now you're at least a coward no longer. You see I've got a funny mind, I think. I like to know things. It helps one make plans."

"But, Jo—there's much more to say. It isn't just like that—Shall I marry you? No. There's more."

"There really isn't," she declared. "You explained quite fully, without words, when you came down from London that matters were quite the same as ever. You'd got on but I hadn't. I was just the same jazz girl with the short skirts and a lot of knees and a good time brain. Not the kind of a wife for the great creator of a beautiful thing for future generations to marvel at. Why tell me all over again?"

He knew she was mocking him, and he realized that he was helpless. A thousand things hung on his lips. In her calm scrutiny of him they jumbled. She reached to him again and patted his sleeve. "We'll have a drink over it all, someday," she said. "Meanwhile I shall stop drinking all of my cocktails to you. Now go along into the house. You will find Yvonne in the reading room. I'm going to have one of Teddy Dorninster's horses saddled and ride over for tea with Roddy Kenilworth at his house."

She gave him her hand and smiled up at him. "You will not be seeing much of me now until the fete," she said. "It is so near and I have so much to do. But I shall want you to dance with me that night. By then we shall have both forgot today."

She watched him until he disappeared beyond some shrubbery that cut off the view of the house. Then she turned toward the stables, but had not gone far when she stopped. She stood for a moment looking about her. When she saw that none of the workmen nor attendants were near, she crumpled onto the lawn, and lay, face buried in the grass, her shoulders shaking convulsively.

CHAPTER XXX

Joanna's Decision

A stable groom fumbled with his cap when Joanna had chosen her horse and sent to the house for the riding togs into which she proposed to change in the stable dressing room. The man gazed dubiously down the Cap Martin slope and estimated the thickening blanket of violet haze.

"It'll be coming up fast, Mademoiselle, after a while," he said. "It's troublesome to ride through when it gets too heavy, I shouldn't advise Mademoiselle to go too far."

"Just along the sea road, to Mr. Kenilworth's," she informed him. "The lights there are never lost."

The groom would have liked to voice more insistent caution, but his mistress was abrupt with him. There were times when the servants at Villa Amette were afraid of their Mademoiselle Joanna. The groom shook his head but decided not to venture a further protest. He reflected that, after all, she was a good horsewoman and that a horse usually is dependable.

Kenilworth, whose villa nestled at the base of the hill, shut off from the

majestic boulevard which skirts the shore by a dense hedge of semi-tropical bush, met her, with his own groom, at his gate. She stepped lightly from his hand to the ground and tossed her bride to the man. "Just an hour, please," she commanded.

Kenilworth immediately expressed dismay. "You haven't braved the idea to give me but an hour! It will take me quite that long to get accustomed to the vision of you among my things."

"Just an hour, Roddy," she insisted, nodding to the groom who accepted her order as final and led the horse away. "You see I've made plans for the evening, and I mustn't interfere with them. I shall have to get back to Amette and change."

It was the first time Joanna had granted Kenilworth a tête à tête hour "in the midst of his things," as he expressed it. She had always made a pretense of "being afraid" of him, which he customarily retorted, was flattery but untrue. He assured her, at such times, that she was one who wouldn't be afraid of anybody. He had desperately proposed Lady Weymouth as a chaperone, but with no success. Joanna asserted that she'd never resort to a chaperone—"in these days."

He was, then, puzzled by the sudden whim which brought her, unbidden, and strangely vibrant. He knew her well enough to sense a purpose. Joanna, he had discovered long ago, usually concealed a purpose behind whatever was unexpected of her. He had made a profession, almost, of discovering those hidden purposes and fathoming them.

"Confess to me," she challenged him when she had settled in a great chair before the log fire which baffled the cool dampness of the increasing mist outside, "you are wondering why I came so unexpectedly."

(To Be Continued)

Little Helps For This Week

The merciful man doeth good to his own soul.—Prov. XI, 17.

The quality of mercy is not strained: It droppeth as the gentle dew from heaven Upon the place beneath: It is twice blessed,— It blesseth him that gives and him that takes.

—Shakespeare.

We are unmerciful when without necessity we are judges of evil thoughts, when we suspect meanness, littleness, untruthfulness—not to speak of worse surmises—in others. The merciful in thought give no room in their hearts for suspicions such as these. They do not secretly impute evil.—Richard Chenevix Trench.

Constructing Speed Boat

Frenchman Will Attempt to Cross Atlantic in 48 Hours

An attempt to cross the Atlantic ocean in 48 hours will be made in a motorboat now being constructed by M. Bugatti, the French automobile manufacturer.

The boat is made of steel construction of the submarine and will have eight motors. It is a chaser type. It is 35 meters long, is expected to make 140 miles an hour in a calm sea and 100 miles an hour on an average sea. The boat will make a trial trip soon on the Seine.

THE NURSING MOTHER

Often Finds Herself Weak and Feeling Worn-Out

The nursing mother more than any other woman needs rich blood and plenty of it. The demands upon her health are many and severe. Household duties and the care of her children exact heavy toll, while hurried meals, broken rest and indoor living tend to weaken her. No wonder she is often indisposed through weakness, headaches, backaches and nervousness. In this condition the blood will always be found weak and watery, and relief will come only through enriching the blood. For this purpose Dr. Williams' Pink Pills is the best blood-making tonic known. Through their use many weak, ailing wives and mothers have found new health and strength. As an example of this Mrs. Sarah Cooze, Ellensburg, N.B., says: "While nursing my baby I became run-down, very weak and nervous. My head ached all the time and I was not able to do my work. I had often read of Dr. Williams' Pink Pills and began using them, and what a blessing they proved. Before I had used a half dozen boxes I felt like a new person, and by their continued use for a while I was entirely restored to my former health and strength. I take pleasure in recommending Dr. Williams' Pink Pills to everyone suffering as I did."

"You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont."

The patient usually has more confidence in the physician than the physician has in himself.

Some men who live by their wits have to get along on very small capital.

CHAPTER XXIX—Continued

It was not wistfully said, nor in reminiscent tone. She was standing apart from him, and spoke as if voicing a casual thought. A frown came into his forehead.

"Those are not good memories to have," he said. "This sort of thing gives them a sting."

She looked at him in open wonderment. If this wonderment was a mask, she concealed it skilfully.

"No memory has a sting, John," she returned. "That is, if they are the kind of memories that are worth while treasuring. The more we miss things we once had, the more gracious is the recollection of them. I've put a little bit of that house we used to play into every one of these things I've built here. Funny, isn't it?"

"The house, if I remember, was to last a lifetime. This is to be the humor of a night. I can't understand what part of one could be built into the other."

"Love, John! Into the other you put what was your love—your idea of it. Into these things here I've put that love of yours, my dear—taken it from the home you would have built, and put it into this. It was you, you know, who said, just now, that the other was for a lifetime, and that this will be desolate and crumbled in the morning. At least I expect nothing more of this."

He was silent. She left him for a moment to give an order to the Amette gardener who supervised the sowing of the blossoms which were to shed their perfumes for a night and then wither. When she went back to him John said, with the blunt suddenness that echoed a determined resolve:

"There's something I must say to you, Jo. It's been trying to come out for days, now, and I know you've been expecting it. I've been rather a coward."

"Rather a coward, John?"

It was said, quietly, softly, but there was something deadly in the manner of it. He flushed, but went stubbornly on:

"Yes, rather. It's to be about

Yvonne, you know—Yvonne and me."

Again that quiet, soft interruption. "Tell me, John: are you going to marry me?"

This time she was looking at him. He could not evade those brown eyes that were darkened by the purple haze in the air, and whose customary fires seemed to have cooled into a lazy smoulder. While he shifted nervously, she drove in her challenge:

Joanna crumpled up onto the lawn and lay, face buried in the grass, her shoulders shaking convulsively.

"Don't be a coward always, John. I love you. I love you as a girl seldom knows how to love. The marvel of my own money, and its mystery and the threat that is hidden in it somewhere, has never appalled me so much as your success and the grandeur of the thing you are succeeding in doing. That has made my love more of a woman's than a girl's, somehow so it will stand much. Even your cowardice. Now you're being brave again, so go all the way in now. Never mind the steps in between. You've a fortune of your own in sight, so my money needn't count now. Shall you marry me?"

"No, Jo. You see Yvonne has—"

She stopped him instantly. "That's splendid!" It was quite as if she were

Druggist Gave Her Advice

Miss Ruth Horowitz, Bronx, N. Y., writes: "Having been troubled with indigestion caused by constipation for several months, my druggist advised me to try CARTER'S LITTLE LIVER PILLS. He said they are good for a hundred different ailments, if people only knew the value of them. I can safely say that since I am taking them, and only one each night, I feel like myself again and can eat most anything."

"Those who suffer from sick headache, indigestion, biliousness, tired-out and achey feeling, when due to constipation, will find relief in taking CARTER'S LITTLE LIVER PILLS."

CARTER'S LITTLE LIVER PILLS in red packages, 25c. and 75c. Try them to-night—To-morrow refreshed—All druggists.

"If that knife falls
someone must die."

The strangest oath
man ever made,
but it's just what
makes this a power
ful drama---a dra-
ma of a man who
is strong in cour-
age--great in sacri-
fice--greater in un-
dying love.

"Dean Inge has a very imperfect
appreciation of the feeling of India
towards England, when he prophe-
cies that India's attitude to the
Mother Country in the event of a
future crisis, is doubtful," declared
Diwan Bahadur Sir T. Vijayaraj-
hacharya, Indian potentate who
sailed for England on the Canadian
Pacific liner Empress of France re-
cently after a lengthy tour of the
Dominion. The Diwan discounted
the gloomy prophecies contained in
Dean Inge's new book entitled "Eng-
land."

For the third consecutive year
the first aid team of the Canadian
Pacific Police Constabulary at the
Windsor Street Station, Montreal,
carried off the "Gutellus Cup" sym-
bolic of the highest marks obtained
in the Quebec District C.P.R. first
aid competition. The examinations
were conducted at the Place Viger
Hotel in Montreal, September 29th
by Dr. Beatty, chief surgeon of the
Canadian Pacific. Four other teams
were in the field including two from
the Angus Shops in Montreal, and
one from Ottawa and Quebec.

APPLE SAUCE

Small Brother—Say sis, can I
hang up your stocking Christmas
eve?

Big Sister—What on earth do you
want to hang up one of mine for?
Small Brother—So's I can see
what I got without getting out of
bed.

"Income tax" grumbled the car-
pet, as dad got busy with his ham-
mer.

"I knead thee every hour" sang
the God fearing baker, as he mixed
up another batch of dough.

Olga—There goes Irys, the human
dynamo.

Tom "Dynamo?"
Olga—Yes everything on her is
charged.

Jack—I'm hungry for beautiful
girls.

Bill—So am I, but the beautiful
girls are too hungry for me.

"Well I had to come down any-
way," said the man who had just
fallen down a flight of stairs.

"Mandy, why yo' all name dat
chile opium?"

"Because they say opium comes
from de wild poppy, and dis chile's
poppy sho' am wild."

The honeymoon is over when
she wants a coupe to keep warm.

A CHARCOAL SKETCH

Two negroes unloading coal at
midnight.

I learned to dance in one even-
ing
Yea, I thought so.

Bachelors in Rome between 25
and 65 are to be taxed to provide
funds for the National Maternity
fund and Child Welfare scheme.

Canadian apples are now on sale
in Paris, France, in the central mar-
ket and in the shops. Shop window
displays of the fruit are reported to
have aroused quite a wave of ad-
miration.

Alberta's visible coal supply is
about 57 billion tons, Premier
Brownlee declares. With the pos-
sible exception of China, Alberta
has the greatest coal deposits in the
world. The annual production from
the province averages around 6,000,
000 to 6,500,000 tons.

Farmer-Owned Elevators

At almost a thousand different points in the
Prairie Provinces there are Farmer-owned
Elevators. The overwhelming verdict of
Western farmers is that Farmers' Elevators
are absolutely necessary to the country,
and that Farmers' elevators improve condi-
tions where they are established.

True Distinction

The Most
Beautiful Chevrolet
in Chevrolet History

NOT merely to provide an econo-
mical means of transportation has
been the aim in the making of the
Most Beautiful Chevrolet—but to pro-
duce a car, at low price, which would
satisfy the motorists' finer tastes.
True distinction is evident in every line
of the Fisher Built Bodies of the Most
Beautiful Chevrolet in Chevrolet His-
tory. Refinement and good taste are
reflected in the new Duo colorings—
in the rich, luxurious upholstery—in
the handsome new radiator design—in
the massive full-crown fenders—in the
fine-quality hardware—in the complete-
ness of the appointments.

As there is the quality of the thorough-
bred in the appearance of the Most
Beautiful Chevrolet in Chevrolet His-
tory, so there is the same quality in its
performance. New refinements, added
to the smooth, powerful Chevrolet en-
gine (the New A C Air Cleaner and Oil
Filter, for example) offer definite assur-
ance of longer life, better operation and
greater economy.

The Most Beautiful Chevrolet in Chev-
rolet History is now selling at NEW
and LOWER PRICES—the lowest for
which Chevrolet has ever been sold in
Canada.

NEW LOWER PRICES	Roadster, \$655.00	Touring, \$655.00	Coupe, \$780.00
	Coach, \$760.00	Sedan, \$865.00	Landau Sedan, \$930.00
	Cabriolet, \$890.00	Roadster Delivery, \$655.00	
	Commercial Chassis, \$490.00	Utility Express Chassis, \$645.00
